# Module 1

## Unit 1: Introduction

• Designed to:

- Increase the number of Georgians reached with poison prevention education
- Encourage the adoption of long-term behavior change, maintenance of a safe and healthy environment
- Teach Georgians to identify potential poisons, prevent potential poisonings, and respond appropriately in a poison emergency
- Upon completion of the training, individuals will be equipped with the knowledge and resources to promote poison prevention activities in their communities in an effort to encourage Georgians to adopt safe and healthy poison prevention habits.
